

# Acterys - Integrated Planning & Analytics

## Benefits for Accounting Practices

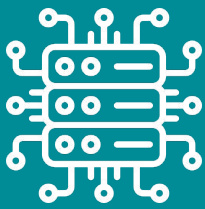

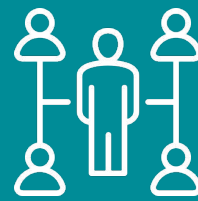

### 20% Increase in Client Revenue

With the powerful combination of real-time planning and proven reference models for everything FP&A, enable your clients to realize significant cost savings in the form of agile reporting and faster time-to-insight for data-driven decision making.

### Cut Costs by 1-2 FTE

Save costs on hiring additional FP&A resources by automating integration, report generation, budgeting, and group company consolidation and eliminations tasks.

### Automated Financial Data Consolidation & Integration

Consolidate accounting data from as many entities as you like and perform smart currency conversions, intercompany eliminations and manual journals. Integrate data from non-financial sources, like HR, marketing, operations, etc., instantly to get a complete picture of your business.

### Advanced Analytics & Visualization

Leverage AI-enhanced visual planning capabilities to see the impact in real-time and translate them into stunning dashboards in Power BI

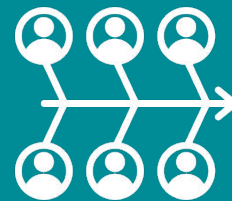

### All-in-One FP&A Solution

Instant integration with any accounting & ERP software, robust financial modeling, and a holistic reporting package, all packed into a single integrated platform.

### Effective Collaboration & Tailored Workflows

Work with Microsoft's latest technologies like Teams, Powerapps and Flow to experience real time collaboration, powerful workflows and tailored mobile/web analytical applications without any coding.
