

End-to-end reporting, consolidation and planning solutions tailored for Xero

Xero is a powerful tool to keep track of cash flows, reimburse claims, or reconcile bank payments. Conventionally, connector interfaces are required to seamlessly integrate Xero financial and accounting data to Power BI.

However, integrating Xero and Power BI is another story altogether. Visualizing cash flow and costing data for the purposes of creating rolling forecasts and budgets or making any other financial planning decisions in near-real time is at best an illusion.

With Acterys Xero App, it has been transformed into a wonderful reality.

Acterys lets you have a unified virtualized data warehouse platform that seamlessly fetches Xero-based PowerBI dashboards for near real-time reporting without requiring any tedious development efforts.

Acterys Xero App Benefits

Instant Connectivity

- 1-click integration to Xero automatically brings all your financial and accounting data into a data warehouse.

Start Analyzing Now

- Instantly view your Xero data populated in best practices in best practice reports, interactive dashboards, and data entry forms.

xP&A Ready

- Take action on your Xero data by using the Acterys planning and simulation features. Enter top-down and bottom-up assumptions to visualize business impacts, immediately.

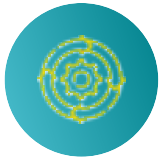

Security

- Trust the Microsoft technology-based security and comprehensive governance so you can plan with confidence.

Seamless Reporting

- Get automated workflows for Xero reporting and schedule tasks for approval, budgeting, report distribution, and more.

Unparalleled Xero Reporting & Planning with Ease and Speed

Complete Control

Comprehensive, organizational performance at your fingertips using interactive management dashboards and reports within Power BI or Excel

Single Source of Truth

Zoom into transaction-level insights or zoom out to view summaries from a consolidated dashboard in seconds

Customize on the Fly

Automatically see reports and dashboards of your pre-populated Xero data. Flexibly customize and enhance any report using Power BI or Excel

Best-in-Class Templates

Utilize our most popular customer-tested templates. Pre-built reports for legal consolidation, cash flow budgeting and forecasting can be used to analyze financial performance, faster

End the Spreadsheet Chaos

Stop importing and maintaining hundreds of spreadsheets that “fly” uncontrolled across your teams. The live data model link ensures your Xero reports automatically update when changes are pushed to Acterys

We are using Acterys Xero connector for PowerBI. And it is a breeze. It creates for you a warehouse of Xero data by putting API communication with Xero in complete abstraction. It has really enabled staff of my organization to consume Xero data in PowerBI reports without involving developers.

- **Head of FP&A**

We tried all other reporting apps in the Xero market place - none provided the flexibility and analytics capability as Acterys. We can work from our familiar Power BI Desktop and Excel environment and can build dashboard and reports exactly as needed as well as forecasting and planning processes

- **Chief Financial Officer**

What is Acterys?

Acterys is an Extended Planning & Analytics (xP&A) for Xero that integrates with Microsoft Azure, Power BI and Excel seamlessly. Acterys is the perfect integrated planning and analytics partner for businesses that provides an agile and secure solution to enhance efficiency and reporting flexibility for smarter, timely decision making.
