

End-to-End Reporting, Consolidation and Planning Solutions Tailored for Oracle NetSuite

Offering a complete suite of ERP capabilities in the cloud, Oracle NetSuite is a business management powerhouse designed for organizations of all sizes across multiple industries. It gives a consolidated platform for all financial and operational processes, including CRM, supply chain management, sales & marketing, finance & accounting, and much more. Since all modules share a common underlying infrastructure and a central database, information flow across the organization is seamless, enabling easy accessibility and fostering collaboration across core business functions.

While NetSuite comes with a reporting and analytics module out of the box, strategic business planning, forecasting, & budgeting still remain a manual and complex chore, putting organizations at a competitive disadvantage.

This is where Acterys helps fill the large-scale Extended Planning & Analysis (xP&A) gap. It is an integrated performance management platform that offers professional financial reporting, planning & consolidation solutions for NetSuite-powered organizations.

The Acterys App for NetSuite provides cutting-edge extended planning & analytics (xP&A) functionality to analyze what's happening today, plan for tomorrow, and strategize for future success. Use comprehensive reporting and forecasting features to analyze data and metrics from CRM, Sales & Marketing, Finance, SCM, HCM, and other key modules. And with built-in analytics, identify and seize winning opportunities to ensure profitability and growth with every business move.

Key Benefits

Instant Connectivity

- 1-click integration to Oracle NetSuite automatically consolidates finance, marketing & sales, inventory, and customer data into a smart data warehouse available both on-prem and the cloud (Azure/SQL).

xP&A Ready

- Take action on your NetSuite data by using the Acterys planning and simulation features. Enter top-down and bottom-up assumptions to visualize business impacts, immediately.

Security

- Trust the Microsoft technology-based security and comprehensive governance so you can plan across your enterprise with confidence.

Seamless Reporting

- Get automated workflows for NetSuite reporting and schedule tasks for approval, budgeting, report distribution, and more.

Consolidated Business Insights

- Get a holistic picture of your business performance by adding multiple NetSuite datasets and consolidating them with other sources

NetSuite Reporting & Planning at Hyper Speed

Complete Control

Comprehensive, organizational performance at your fingertips using interactive management dashboards and reports within crowd favorite frontends, like Power BI or Excel.

Cross-Functional Collaboration

Get input from core business functions (sales, finance, production, etc.) and collaborate at every step (report, visualize, plan, and simulate scenarios) to handle any xP&A scenario.

Customize on the Fly

Automatically see reports and dashboards of your pre-populated NetSuite data. Flexibly customize and enhance any report using Power BI or Excel

Best-in-Class Templates

Utilize our most popular, customer-tested templates. Pre-built reports for legal consolidation, cash flow budgeting, and forecasting can be used to analyze business performance, faster.

End the Spreadsheet Chaos

Stop importing and maintaining hundreds of spreadsheets that “fly” uncontrolled across your teams. The live data model link ensures your NetSuite reports automatically update when changes are pushed to Acterys

The ability of Acterys to be customized to fit your company's planning process is very powerful. Its data storage resides on an SQL DB, but end users view/edit their budgets from within Power BI and Excel. We are solving budgeting/forecasting/ planning processes by allowing users view and edit their budgets within Power BI & Excel. ”

- Head of FP&A

We really liked the fact that Acterys is a true cloud CPM solution that leverage Power BI. The write back from Power BI is pretty good. The Acterys teams is super reactive to feature request, or question we may have. The main benefit is the simplicity of putting together a planning and budgeting solution compared to other CPM vendor we have evaluated. ”

- Chief Financial Officer

What is Acterys?

Acterys is an Extended Planning & Analytics (xP&A) platform that allows users to work with Microsoft Azure, Power BI, and Excel seamlessly. With unparalleled planning and analytics capabilities, Acterys provides an agile and secure solution to enhance efficiency and reporting flexibility for smarter, timely decision making

Monthly Subscription for Acterys Apps

It includes unlimited data models, 8 Power BI custom visuals, Acterys Modeller, Azure/SQL data warehouse, best-practice reporting, planning & forecasting templates, and much more.
